

TOWN & COUNTRY
LUXURY FIREPLACES

*it's all
about
the
flame*

It's all about the flame

Town & Country was born from the simple observation that discerning fireplace buyers could not acquire what they were really looking for, a high quality, direct vent fireplace that was primarily focused on the aesthetic quality and realistic look of the fire.

Town & Country pioneered the clean-face fireplace, free of louvers, gaps and unsightly controls, presenting a picture perfect frame for a mesmerizing flame. Our decorative direct vent technology allows for realistic flames in a sealed firebox greatly surpassing traditional open fireplace logsets in safety and efficiency.

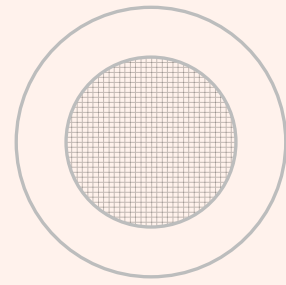

We combined these technological leaps in a firebox of unparalleled quality. Heavy gauge materials, fully seamed welded for longevity and silence, premium ceramic panels, glare free glass, invisible micro mesh safety screen and state of the art controls allowing for simple push button operation, smartphone app or full smart home connectivity.

We take great pride in bringing you the worlds finest luxury fireplace, we look forward to making your fireplace the centerpiece of your home.

Innovative Features

CUTTING-EDGE QUALITY,
BEAUTIFUL DESIGN

Fire is a simple, primal element, but Town & Country luxury fireplaces offer many contemporary innovations to control and enjoy it's warmth and beauty within your living space.

THE FINEST SAFETY SCREENS

Our built-in safety screens are nearly invisible and offer reliable protection for young children, without compromising the aesthetics of your fireplace.

SEAMLESSLY INTEGRATES INTO HOME AUTOMATION SYSTEMS

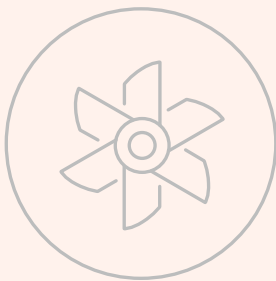

Smart Home compatibility conveniently allows you to control the many functions of your fireplace while at home by interfacing with the most common smart home control systems, as well as remotely via a smartphone app.

QUALITY – BUILT TO LAST AND PERFORM

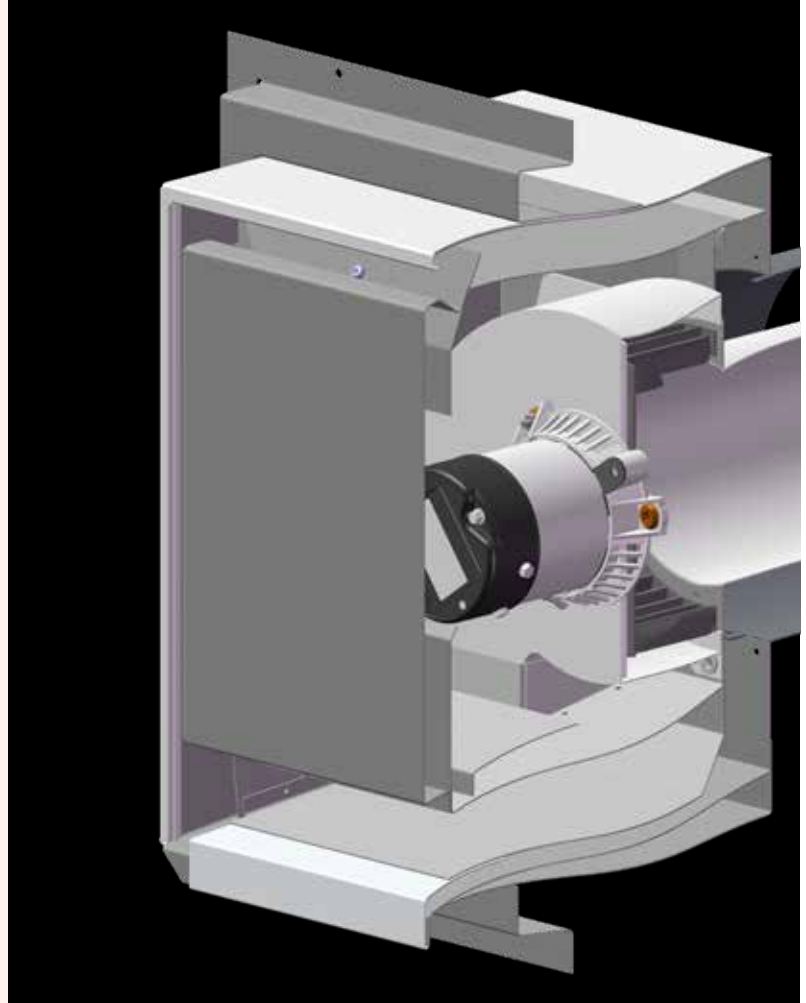

Town & Country's luxury fireplaces are individually handcrafted. To eliminate any distracting noises, our fireboxes are continuous-seam welded, and are the heaviest in the industry. The result is quieter, safer operation, and more durable performance dramatically improving longevity and reliability.

OPTIONAL POWER VENTING GIVES YOU MORE OPTIONS

As well as being able to naturally vent most of our fireplaces, our industry-leading power venting system allows you the freedom to locate a fireplace up to 110 feet of run from an outside wall*. The sleek Power Vent Wall Termination mounts flush to an exterior wall and can be painted to match your home's existing color, so it's unobtrusive.

Indoor Fireplaces

let your imagination go

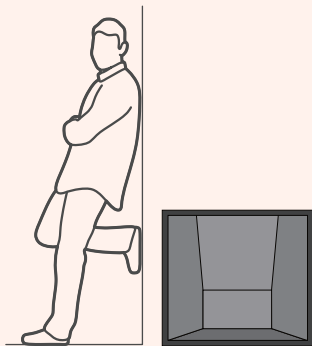

As an integral design element, a fireplace should be as impressive as every fine decor detail of its surrounding home. With more unique combinations than you can possibly imagine, our Design-A-Fire system allows architects and interior designers the creativity to tailor all the details of a Town & Country fireplace to perfectly suit your space, whether it's a grand room or a bedroom. Think of it as a blank palette that can be designed into a gorgeous architectural feature with a variety of aesthetic choices – from the size and shape of the firebox to the burner style and much more.

TRADITIONAL

TC30

Transform the ambiance of a space such as a small bedroom or sitting area with dramatic flames on full display. Town & Country's TC30 fireplace is the first design-driven gas fireplace perfectly sized for smaller spaces and renovation projects. With our Design-A-Fire versatility you can tailor the look—from the firebox panels to the burner—to suit your style.

TRADITIONAL

TC54

Town & Country's TC54 is the world's largest factory-built, direct-vent gas fireplace, grandly proportioned to fit in great rooms and commercial settings that previously required a custom-built hearth. Tall, vibrant flames dance behind premium "disappearing" ceramic glass—a material so non-reflective your guests will believe they're looking at an open fire. When size matters, the luxurious TC54 gas fireplace delivers a massive performance.

Installation

Building your dream house is a complicated process, but the flexibility we've designed into our installation – from architect to builder to interior designer – makes adding a Town & Country fireplace smooth and seamless. The unit is framed-in during the construction phase and later, after the theme or aesthetic of the room has been decided, the interior designer can choose the fine details – from the firebox panels to the flame.

STEEL STUD FRAMING KIT

All Town and Country fireplace models come complete with an adjustable depth, heavy 20 gauge steel framing kit.

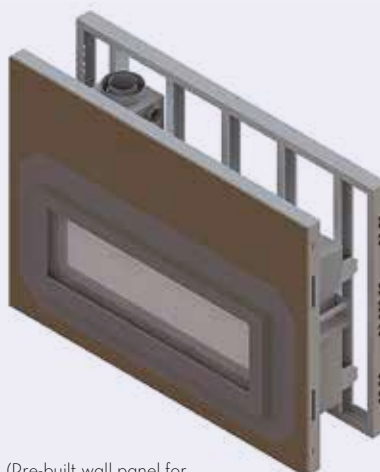

(Steel Stud Framing Kit for TC WS54ST shown)

Installation instructions must be consulted before framing. Specifications subject to change without notice.

PRE-BUILT WALL SYSTEM

All Town & Country indoor-outdoor fireplaces come complete as part of a pre-built wall panel.

(Pre-built wall panel for TC WS54ST indoor-outdoor shown)

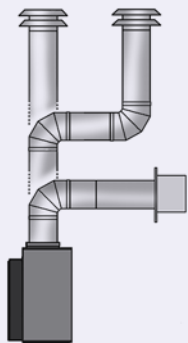

Installation instructions must be consulted before framing. Specifications subject to change without notice.

HEAT TRANSFER COOL WALL SYSTEM

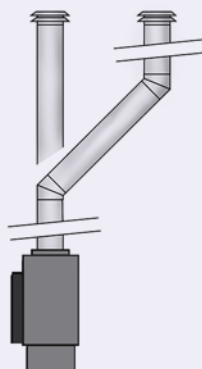

The Town & Country cool wall system channels heat to create a cool space directly above the fireplace. Available on the TC42 only (at time of print).

Conventional Venting

Most Town and Country gas fireplaces can be vented naturally with our co-axial venting systems. The advantage is no power is required. If you require a more compact vent system with unusual lengths of run and rise, investigate our revolutionary power venting systems.

Standard venting configurations for:
TC30, TC36, TC36 Arch,
TC36 See-Thru, WS38, TC42,
TC36 Outdoor and TC42 Outdoor

Standard venting configurations for:
WS54, WS54 Outdoor
and TC54.

DIRECT VENT TERMINALS

Standard venting terminal for roof installation

Standard venting terminal for wall installation

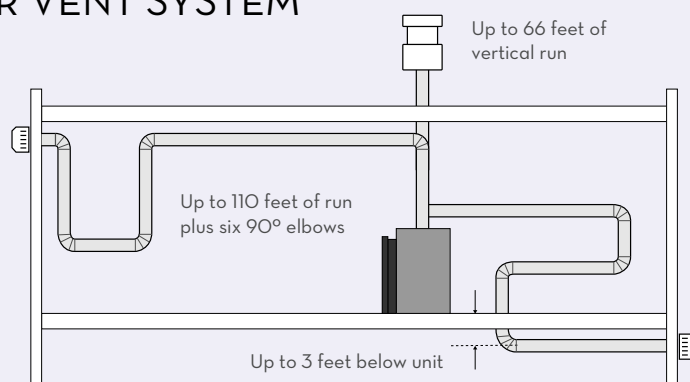

Stainless Steel wall venting terminal for condo installation

Flush Mount Power Vent Termination

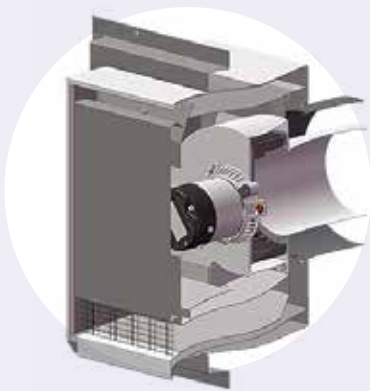

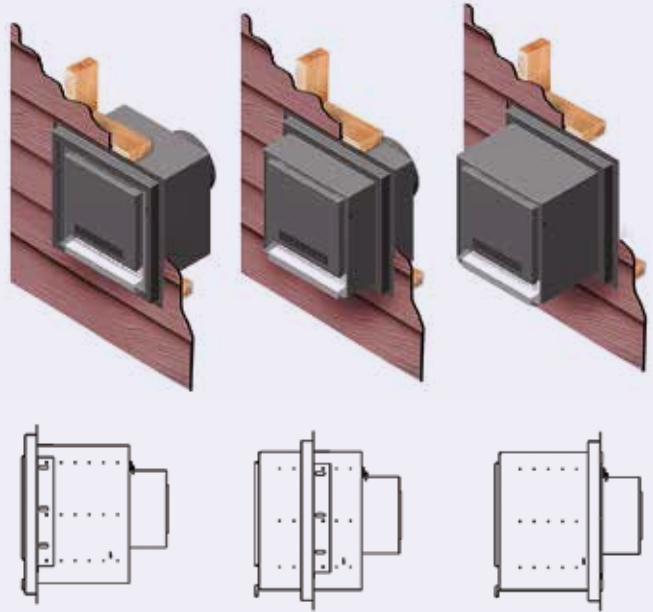

VENT ABOVE OR BELOW GRADE WITH TOWN & COUNTRY'S REVOLUTIONARY POWER VENT SYSTEM

All Town & Country gas fireplaces are direct vented, meaning each fireplace is independent of your home, drawing its combustion air and expelling its exhaust to the outdoors, with no impact on your indoor air quality regardless if using a conventional or power vent system.

Flush Power Vent Wall Termination

Town & Country gave you the first clean face fireplace to enhance the beauty of your home's interior. Now that same industry-leading innovation is helping to maintain the beauty of your home's exterior, with the first Clean Face Power Vent Termination System. Mounted flush to the exterior wall, the vent can be painted to match your home's existing colour and sight lines.

ULTRA QUIET HIGH-TECH FAN

Smart-chip technology controls precise CFM air movement with whisper-quiet operation.

POWER VENT TERMINALS

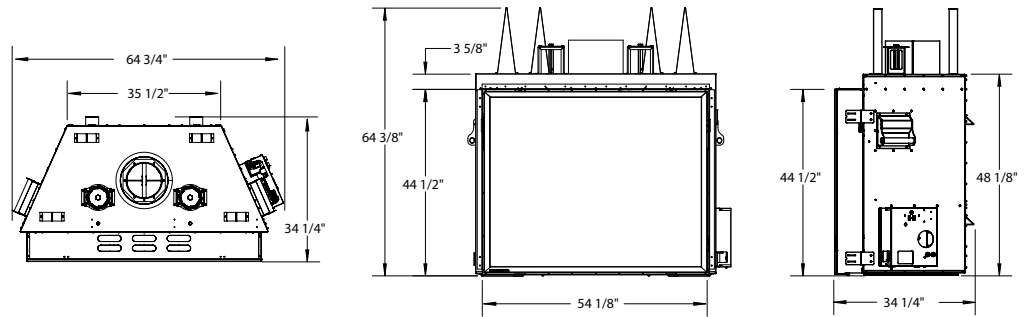

Power vent terminal for roof installation

ARCHITECTURAL

TOWN & COUNTRY

SERIES

The Architectural Series invites you to ignite moments to remember: lit by the perfect flame, enhanced with LED lighting, dancing on a bed of tumbled diamond glass, with as much – or as little – intensity as you want.

Corner Right - 5' Viewing, 16" Tall Glass,
Titanium Enamelled Panels

Single Sided - 6' Viewing, 16" Tall Glass,
Black Enamelled Panels

Flexibility without a premium

The Architectural Series fireplaces are designed to fit your imagination. Zero-clearance installations*, load-bearing designs*, and a custom firebox airflow system so you can complete the look with artwork or a big screen TV, right above the fireplace.

With seven layouts, three glass heights, and flames that run 5' to 8', you can add a luxury fireplace into virtually any design.

Explore the dedicated Architectural Series brochure or talk to your dealers for more information and inspiration.
